

Requests for Legislative Change
Presented by Attorney Harold Cogdell at a Town Hall Meeting
October 30, 2016 (Little Rock AME Zion Church)

Of the eight items presented, the below represent relevant items for CMPD,
all of which align with our current work to some extent.

Requested Legislation	Response
Disclosure of video within 3 business days of officer-involved shooting	CMPD does not support a specific time limit on releasing the video. CMPD supports disclosure of OIS shooting only after the immediate family has had an opportunity to review. After the immediate family has reviewed or declined to review, CMPD supports disclosure of video to the public if release does not create a serious threat to the fair, impartial, and orderly administration of justice.
Data collection & reporting to public & USDOJ on in-custody deaths	To meet this request would require adding in-custody death reporting to Open Data Page** To meet this request would require adding reporting in-custody deaths to USDOJ
Data collection & reporting to public on frisks	To meet this request would require adding frisks to Open Data Page**
Annual mandatory de-escalation training	De-escalation training was previously encompassed in other training, but it is now a dedicated topic of instruction for all officers

** IT would need to create additional tie-ins to link the data not currently reported to the public.
